Summary of Experience

- Working in product team in **Deloitte** for more the **2 Years** and worked on one of the most important Tools of Deloitte called "DTEST"

- DTEST facilitates E2E automated testing which increases test coverage, accelerates testing for the clients. Paplesh has worked on important enhancement called "Touchless Testing"

- Paplesh has developed more than **25 REST APIs** and worked on more than **50 SQL Scripts** & around 10-15 Project Documentations, over a period of 1.5 Years

- Worked on more than **100 BI Publisher reports** to extract data from various modules e.g., PTP, RTR, PTC, OTC, PTM

- Because of BI reports, Got great exposer to the functionalities of the various modules in Oracle Cloud Fusion e.g., AP, AR, OM, Inventory, Product Hub, Projects etc.

- Paplesh has Led the BI Reporting Team and learnt management skills by helping 4 analysts to start their BI learning and making them contribute to the project deliverables. He was responsible for QA, tracking weekly status and published them to leadership

- Paplesh has worked on the Development of Data Extraction Tool using the **Angular & Node JS** which extracts the various report data from **Oracle BI** and place it to the shared location for other application to process

- Participated in various learning activities and training programs and GOT a chance to provide bootcamp training on **APEX** for 4 days to the folks

- Previously worked on **Oracle EBS** for **4** years in **Cognizant** and got a chance to work on various modules and technologies for the **Fiserv** Client
